Avisame

Get your Avisame ready

USB · 5 V / 1 A | Wi-Fi · 2,4 GHz | Android / iPhone

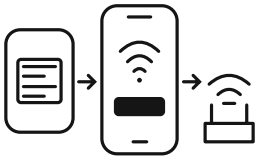

1 Plug in your Avisame

Use a USB charger rated at 5 V, 1 A or more.

The blue light blinks slowly.

2 Connect it to your Wi-Fi

The network name and password are on the device label.

On your phone, open Settings → Wi-Fi.

Choose the Avisame network shown on the label.

Enter the password from that same label.

On the page that opens, choose your 2.4 GHz Wi-Fi.

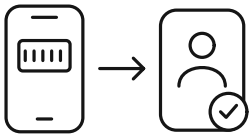

Enter the password and tap “Connect”.

Stay on the Avisame network, even if it says “No internet”.

Did the page not open? Type this address in your browser:

http://192.168.4.1

3 Add it to your account

Save the code shown on the page.

Switch back to your home Wi-Fi or mobile data.

Tap “Continue”. Create an account or sign in.

If the page closed, enter the code here:

avisame.cc/vincular/

Something not working?

Check the cable, Wi-Fi password and that the network is 2.4 GHz.

If it already has an owner, avoid repeated restarts: they could open an ownership transfer.

Continue on page 2.

Phone and lights

4 Avisame on your home screen

iPhone · Safari

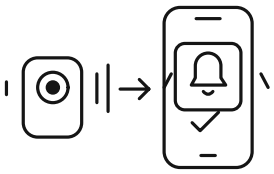

Open avisame.cc in Safari.
Tap “Share”. It may be under “More”.
Choose “Add to Home Screen”.
If “Open as Web App” appears, turn it on. Tap “Add”.

Android · Chrome

Open avisame.cc in Chrome.
Tap the three-dot menu.
Choose “Add to home screen” or “Install app”.
Confirm “Add” or “Install”.

Open Avisame from its icon. Sign in if asked.

5 Choose and test your alerts

Open your device. Give it a name.
Choose the sounds you want to detect.
Tap “Enable notifications”, then “Allow”.
Send a test from notifications.
Calibrate background noise. Keep quiet for 10 seconds.
Under “Test detection”, try a sound from your home.

The detection test does not send alerts. Test notifications separately.

6 Connect your lights

Open your device → Light alert → Add light.

Smart Life / Tuya	Choose “Add new lamp”. Set it to blink quickly, following its manual. Follow the screen. If that option is missing, use the Smart Life connection.
WiZ	Set it up in the WiZ app. Enable “Local communication” under Settings → Security. Return to Avisame and search for the light.
Tapo	Set it up in the Tapo app. Return to Avisame and search for the light. Enter your Tapo email and password when asked.

Avisame and the lights must be on the same home network.

Tap “Test” next to the light. Check that it blinks.

Under “When do they blink?”, add a rule: sound → light.

Before finishing

- ☐ Device online
- ☐ Icon on your phone
- ☐ Test alert received
- ☐ Light tested and rule saved
